

Aero Components, LLC, founded in 1978, is an OEM approved, full service manufacturer of complex bonded and composite assemblies. Our motto is Always Committed to Improvement. This core belief and operating philosophy is instilled in all of our team members so everyone feels empowered to perform their operation to the utmost quality standard.

We are currently looking to add a 2nd shift hands-on Bonding & Composites Mechanic/Lay-Up Operator to the team.

Lay-Up manufacturing involves manually stacking layers of resin-impregnated roving cloth, usually of fiberglass or carbon weave, in an open mold, and compressing them to form a solid composite product.

Responsibilities:

- Depending on the application, utilize various instruments such as squeegees and rollers to force the layers together and to impregnate additional resin throughout the stack
- Further consolidating forces, such as vacuum bagging or mated molds, can add extra compression if the application warrants it
- After the desired geometry has been formed, the composite is placed in an oven to cure.

Qualifications:

- High degree of craft and technical virtuosity
- Skilled technician that can create complex composite structures
- Responsible for maintaining the cleanliness and housekeeping in work area as directed as well as assuring the accuracy of their work.

To accomplish this job successfully, an individual must be able to perform, with or without reasonable accommodation, each essential function satisfactorily. Reasonable accommodations may be made to enable qualified individuals with disabilities to perform the essential functions.

Aero Components is registered with the U.S. State Department's Directorate of Defense Trade Controls (DDTC) and complies with requirements under the International Traffic in Arms Regulations (ITAR).
